### SECTION 3: COURSE INFORMATION

At FTMS Vietnam we know that professional examinations are very different to academic examinations, and different skills are required to ensure your success. Our lecturers have many years of experience in teaching but, more importantly, they are experienced in teaching students how to pass the ACCA examinations. We believe it is important that our lecturers know the syllabus really well, so we restrict the number of subjects our lecturers teach so that they can specialise and pass the benefits of that knowledge on to you. Our courses are designed to provide you with all the knowledge you need to pass the examination.

#### COURSE STRUCTURE

Our course has several phases, complementing each other to enhance your learning experience:

- **Teaching phase:** in this phase, lecturers will explain the subject content, illustrating the concepts with examples to help students understand.
- **Self-study and practice phase:** after the teaching phase, students will be given a detailed study planner advising them on the reading they should do and the questions they should attempt.
- **Revision phase:** However good students' knowledge, it is vital that they know how to get marks quickly in the examination. Our revision phase will help students do this, enhancing their application skills and fine tuning their exam techniques.
- **Progress test:** at the start of each intake, students will be given a detailed timetable, showing them the dates of the courses and the dates of progress tests and mock exams. The progress tests and mock exams are a vital component of students' exam success and the students should take them seriously. After the teaching phase(s), students are required to attempt a progress test under exam conditions and scripts will be sent to us for marking. Our markers will give students constructive feedback on their areas of weakness so as to enable them to pinpoint aspects for improvement.
- **Mock exams:** after each revision phase, students are required to attempt a mock exam under exam conditions. Mock exams are our subject lecturers' best guess as to what will come up in the real exam, and it is vital that students try this to understand what they might otherwise get wrong in the real exam. The tests and mock exams will be return to your students approximately two to three weeks after submission.
